

# BAUER ELECTRIC WASHER

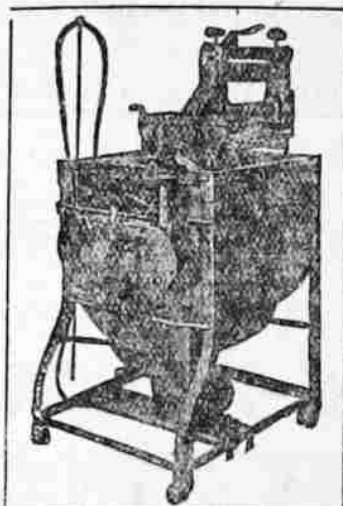

THE 3-IN-1 MACHINE

Washer -- Wringer -- Ironer  
DOES TWO DAYS WORK IN ONE  
WASHING AND IRONING IN ONE DAY

You have washed the clothes in the BAUER WASHER, only an hour or so of the day is gone. You can then turn to the BAUER IRONER in the afternoon and get the ironing out of the way, the same day. The BAUER IRONER does the quick work of the ironing—and all you do is merely guide the articles over the roll. Think of doing the washing and ironing in ONE day. What a saving!

NO RUBBING  
Last Four  
Times as Long

The cylinder of the BAUER WASHER revolves just in one direction—then in the other. The clean, hot soapy suds go through the fabric cleansing every thread. Dirt can't resist it. You take the clothes from the cylinder they are spotlessly clean. Cuffs, shirt bands, collars washed without a single rub. The BAUER washes at dirt—everything comes out of the cylinder sweet and clean—washes and without wear.

## BLANKETS WASHED PERFECTLY

Even blankets are washed perfectly in a BAUER. They are cleansed thoroughly and dry out light and fluffy. Washing a blanket by hand is an impossible task—but with a BAUER you simply put it into the cylinder and let the machine do the work. In a little while it is washed—perfectly clean. Then the wringing—no wrestling with a soggy mass! You just start in through the wringer on the BAUER—and it's ready for the line in a "jiffy." So much labor saved—washed so much quicker. It is really a revelation.

## Washes Everything Clean

BAUER ELECTRIC WASHER washes everything clean—from handkerchiefs to blankets. The machine revolves just in one direction—then in the other. The clean, hot soapy suds go through the fabric cleansing every thread. Dirt can't resist it. You take the clothes from the cylinder they are spotlessly clean. Cuffs, shirt bands, collars washed without a single rub. The BAUER washes at dirt—everything comes out of the cylinder sweet and clean—washes and without wear.

## REFINISHING SHABBY SURFACES ABOUT THE HOME

It is the combination of little things that, properly painted, contribute to the orderly home. Neglected and shabby, they mar the attractiveness of the otherwise well kept home. Here are a few Acme Quality Finishes suitable for the surfaces listed:

- Acme Quality Aluminum Enamel  
Radiators, registers, brackets, ovens, chandeliers, etc.
- Acme Quality Crack and Service Filler  
Fills cracks and crevices in floors of all kinds.
- Acme Quality Floor Dressing  
For cleaning, polishing and renewing finish of varnished floors, woodwork and furniture. Restores original lustre and can be used on dustless floor mops and dusting cloths.
- Acme Quality Furniture Polish  
Pianos, furniture, mantels, cabinets, carriages, bicycles, varnished surfaces of every description.
- Acme Quality Household Paint  
Flower boxes, benches, shelves, cupboards, step ladders.
- Acme Quality Iron Enamel  
Heating drums, sinks, coal hods, grates, and furnace pipes.

- Acme Quality Paint and Varnish Remover  
Removes paint and varnish from floors, furniture, windows, or any metal, wood or other surface.
- Acme Quality Prepared Wax for floors, furniture, woodwork.
- Acme Quality Screen Enamel for screens—window and door.
- Acme Quality Stovepipe Enamel  
Stovepipes, grates, gas ranges, fenders, fire screens, fire fronts, coal hods, oil stoves, blowers, gasoline stoves, gas and water pipe.
- Acme Quality Varno-Lac  
For old or new pipe or hardwood floors, furniture and interior woodwork. Stains and varnishes at one operation.
- Acme Quality Brushes  
The proper brush for any painting or varnishing.

The O. K. line of washing Machines Has certainly been O.K'd. by the People of this Intermountain Section

MORE OF THESE MACHINES ARE IN USE THAN ANY OTHER MAKE

Our advice if you are in the market for a washer, is

"Ask the Woman who uses an O.K."

The O. K. Washers are the most popular priced washing Machines sold in this market

Making washing machines is the business of the H. F. BRAMMER MANUFACTURING CO. of Davenport, Iowa, and they put all the skill they possess into their construction. Only the best materials obtainable are used and the best mechanics employed.

THE O. K. BENCH ELECTRIC WASHER

has a rack on which two large size galvanized tubs and one large clothes basket can be used at the same time. The sliding wringer can be moved to any position while in motion.
